

NEED A PRODUCT THAT WORKS AND HAS A pH UNDER 10?

Do you have certain environmental restrictions in your facility when cleaning your flexographic equipment? Are you required to only use products within a certain pH range? Many companies are trying to reduce their in-plant environmental hazards as much as possible. This is why we developed Flexo Shine™ Lo pH. Undiluted, it has a pH of 9.8. We use advanced chemistry to help maintain an acceptable pH for cleaning, yet maintain pH levels between a pH of 9 and 10 when cleaning. Yes, even when diluted!!! Our water-based, biodegradable formula will not interfere with your in-house water treatment system and will help keep your equipment clean.

- Undiluted pH of 9.8
- Diluted pH between 9.4 and 9.8
- For Removing Water-Based Inks
- Suspends and Emulsifies Ink Quickly
- Readily Biodegradable
- Concentrated For Cost Effectiveness

Use Lo pH by Flexo Shine™ to maintain compliance with pH requirements in your plant. With a pH of 9.8 undiluted, there is no other product at that pH who can beat it!

FLEXO SHINE™
